

Northville Art House,

I loved the after school art classes that the art house instructors did because it gave us ways to express ourselves in art. The instructor that I had for the watercolor fish project was great! Jennifer showed us new techniques and skills, I learned how to make a water colored blue paper into waves with a special ripping technique. Also Jennifer was very nice and so were the other Art House instructors. I loved the after school art classes by the Northville Art House and I hope that there will be more of them.

Thornton Creek Elementary School

I liked the after school art because I get to learn things that I didn't know before. And another reason why I like the after school art is because we get to decide what designs we want on our art. And the last reason why I like the after school art is because we get to do animals and bugs.
